## *HM Sampoerna's Office Management System*

### **Summary**

Client: Plasmedia

Subject: HM Sampoerna's Office Management System

On the Web: [www.plasmedia.com](http://www.plasmedia.com)

By Technology: Enterprise Resource Planning (ERP)

By Industry: High Technology

Together with Plasmedia, we were developing an Office Management System for PT. HM Sampoerna (Sampoerna). The development involves a significant integration process with an early running ERP system within Sampoerna which is Oracle Finance 11.5.9 . The integration process involves relevant data related to Finance, PO and Assets.

### **Business Challenge**

This project is challenging in its own way. We need to have a good understanding on relevant business processes which will be executed through the Office Management System and how it relates to Oracle Finance. In order to develop that kind of fully functional Office Management System, we are required to understand the architecture of Oracle Finance.

### **How We Helped**

Data collection and analysis requires a large amount of time. Different point of views between related parties made it more difficult to finish that process. Fortunately those are not a big deal for our team to handle. The team sent by Bening has good experience in dealing with Oracle Finance. the only issue that slows us down was the amount of work to be done. Sampoerna obviously owns a large scale ERP system. Integrating an Office Management System with Sampoerna's ERP system is definitely not a walk in the park.

### **Technology Involved**

Bening used a set of technology to accomplish the project.

Software:

Oracle Finance 11.5.9, Database Oracle 9, Report Builder Oracle
